DIY Chessboard Flashcards

Thank you for downloading chessboard flashcards set from www.chessboardflashcards.com.

Important!
In this pdf you have 2 versions of chessboard flashcards sets. Between the sets there is a page with a title “Version B”

1. **Important:** The version A was designed for regular double-sided printing. If your printer has a different setting for double-sided printing and your squares get mixed up, try Version B below.
2. **Test Your Printer Setup:** Print the first two pages. If you get "A1" on one side and a black square on the other, you're good to go and can print the complete set.
3. **Use Thicker Paper:** For better durability, print on thicker paper to prevent the text or images from showing through.
4. **Cut Out the Flashcards:** Carefully cut along the lines to create your set.
5. **Start Practicing!** Enjoy the learning process and improve your chessboard visualization.

Recommended Paper Weights:

- **160-200 gsm (grams per square meter)** - Ideal range for flashcards
- Provides good durability and opacity
- Still works well in most home printers
- Prevents text/images from showing through

- **220-250 gsm** - Premium option
- Feels more professional and sturdy
- Similar to light cardstock
- Check your printer specifications first, as some home printers may struggle with this weight

Look for paper labeled as "cardstock" or "cover stock".

Version A of the Chessboard Flashcard Set

Test your printer setup: Print the first two pages of Version A. If you get "A1" on one side and a black square on the other, you're good to go and can print the complete set.

The rest of the page is blank intentionally to support correct double-sided printing.

Version B of the Chessboard Flashcard Set

Test your printer setup: Print the first two pages of Version B. If you get "A1" on one side and a black square on the other, you're good to go and can print the complete set.

The rest of the page is blank intentionally to support correct double-sided printing in case you decided to print all of the pages at once.
